

AppStar Financial gives merchants the option of accepting checks electronically or traditionally.

SECUR-CHEX OFFERS:

- Check Verification
- Check Guarantee
- Check Conversion
- Guaranteed Conversion
- Guaranteed Conversion Plus

Secur-Chex offers you four check services all developed to fit your individual needs. Simply choose the Secur-Chex® option that works for your company.

AppStar Financial gives merchants the option of accepting checks electronically or traditionally.

Process traditionally – with confidence.

Check Verification informs you if a check writer has negative information on the authorization network. Check information may be keyed into a credit card terminal, or checks may be swiped through a check reader.

Check Verification with Guarantee gives you access to the authorization network plus a guarantee* that AppStar Financial will not hold the merchant financially responsible for bounced checks.

Process electronically – in a flash.

Check Conversion allows you to quickly convert checks into electronic transactions, eliminating the need to make bank deposits. Slide checks through a reader for authorization and conversion and get your funds the next business day.

Check Conversion with Guarantee includes the benefits of check conversion and a guarantee* from AppStar Financial that funds will be deposited into your account the following day, regardless of whether the checks are returned. Process with an imager or a check reader – your choice.

*See Guarantee Requirements listed in Terms and Conditions.
